

Now offering our partners...

True Cloud Physical Security as a Service

Simple. Redundant. Scalable. Secure.

Basic Guide to YourSix service offerings:

Cloud Surveillance:

Deploy IP video surveillance cameras; a single button press on the camera initiates a secure connection to the cloud.

Cloud Access Control:

Secure doors/entry point access, high-security room (i.e., server room) access via a badge, fob, keypad entry, plus mobile credentials. Mobile credentials are not only a huge selling point but cost savings as well.

Cloud Audio & Intercoms:

Offer proactive security measures with options to stream music or white noise to offset expensive onsite audio systems.

Cloud Monitoring:

Provide robust analytics and secure, professional monitoring.

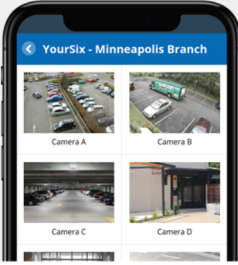

**Physical Security solutions are a standard requirement for most business clients!*

YOURSIX SMARTSECURE PILLARS

Open Physical Security as a Service (PSaaS) with only **ONE-CLICK**

Cloud Surveillance
Cloud Managed or True Cloud is the core of the SmartSecure platform

Cloud Access Control
